

**Dent Award**

Jim Triffitt (Oxford, UK)

**Neil Mackenzie Award**

Emma Morris (Oxford, UK)

**New Investigator Awards:**

(awarded prior to the meeting, based on scores achieved during the blind review process)

- OC1 - Dean Houston (Roslin): Does PHOSPHO1 modulate bone's response to intermittent PTH?
- OC3 - Mark Edwards (Southampton): Longitudinal changes in bone structure as assessed by peripheral quantitative computed tomography and relationships with muscle health in older men and women
- OC7 - Anjali Patel (Bristol): Do alterations in hip shape explain the increased risk of hip osteoarthritis in individuals with High Bone Mass?
- OC8 - Katherine Staines (Edinburgh): Hypomineralisation drives joint instability and osteoarthritis in mice
- OC11 - Sarah Gooding (Wantage): Inhibition of BMP signalling reduces bone destruction in Multiple Myeloma
- OC14 - Jessal J. Patel (London): Vascular smooth muscle cells and osteoblasts mineralise via distinct mechanisms
- OP3 – Iain Savage (Edinburgh): Baseline osteoprotegerin antibody levels are associated with reduced spine bone density in coeliac disease, but not subsequent change in bone density.

On site awards for Best Poster, Best Oral Communication and Best Oral Poster to be announced at the end of the meeting.
