

OSTEOPOROSIS

& OTHER METABOLIC BONE DISEASES

18-20 MARCH 2019, MERTON COLLEGE, OXFORD, UK

This annual 3-day residential training course provides trainees in medical specialties such as rheumatology, endocrinology, care of the elderly, gastroenterology, orthopaedics, respiratory medicine and clinical chemistry with the knowledge and understanding to manage patients with osteoporosis and other metabolic bone diseases.

The course focuses on practical issues relating to patient management and is strongly recommended for any trainee who foresees that patients with these disorders will form a significant part of their workload in future.

Specialist nurses in osteoporosis and falls will also find this course valuable, as well as newly qualified consultants or others wishing to update their knowledge.

TOPICS INCLUDE:

- Underlying physiology of osteoporosis and other metabolic bone diseases
- Identification of signs and symptoms
- Diagnosis
- Treatment options
- Follow up assessment
- Prevention strategies
- Clinical cases
